

ACETI VIN

Nutrient supplement

CHARACTERISTICS

ACETIVIN is a nutrient supplement developed for acetic acid bacteria used in the production of white wine, red wine, cider and honey vinegars.

ACETIVIN makes up for nutrient deficiencies encountered by acetic acid bacteria in certain media that are deficient or highly deficient in nutrients.

In the event of potentially difficult acetic fermentation, **ACETIVIN** ensures good fermentation kinetics leading to complete breakdown of alcohol.

DOSAGE

- 20 to 30 g/hL
- Maximum legal dose according to current European regulations: 40 g/hL.

INSTRUCTIONS FOR USE

- Should first be mixed with part of the liquid to be treated at a concentration of 10 kg/hL.
- For use in vinegar making.
- Use in accordance with current regulations.

INGREDIENTS

Ammonium sulfate (54.9%), diammonium phosphate (44.9%), thiamine (0.2%)

PACKAGING

- 25 kg bags

STORAGE

- Store unopened, sealed packaging away from light in a dry, odour-free environment.
- Once opened use rapidly.
